

Add User by Console Access (ID & Password)

- Login to your IAM console
- In the left navigation panel choose **Users** in **Access Management** section.
- Click on **Add Users**

Step 1 :- Specify user details

- Enter **User name**
- Select box of **Provide user access to the AWS Management Console**
- Select **I want to create an IAM user**
- In **Console Password** select **Custom password** and enter suitable password
- **Deselect** Users must create a new password at next sign-in(recommended).

Console password

☐ Autogenerated password
You can view the password after you create the user.

☒ Custom password
Enter a custom password for the user.

- Must be at least 8 characters long
- Must include at least three of the following mix of character types: uppercase letters (A-Z), lowercase letters (a-z), numbers (0-9), and symbols ! @ # \$ % ^ & * () _ + - (hyphen) = [] { } | ' "

☐ Show password

☐ Users must create a new password at next sign-in (recommended).
Users automatically get the [IAMUserChangePassword](#) policy to allow them to change their own password.

Info If you are creating programmatic access through access keys or service-specific credentials for AWS CodeCommit or Amazon Keyspaces, you can generate them after you create this IAM user. [Learn more](#)

Cancel **Next**

- Click on **Next**

Step 2 :- Set Permissions

Set permissions

Add user to an existing group or create a new one. Using groups is a best-practice way to manage user's permissions by job functions. [Learn more](#)

Permissions options

☐ Add user to group
Add user to an existing group, or create a new group. We recommend using groups to manage user permissions by job function.

☐ Copy permissions
Copy all group memberships, attached managed policies, and inline policies from an existing user.

☒ **Attach policies directly**
Attach a managed policy directly to a user. As a best practice, we recommend attaching policies to a group instead. Then, add the user to the appropriate group.

- In Permission Options select **Attach policies directly**

Permissions policies (1/1050)

Choose one or more policies to attach to your new user.

Filter distributions by text, property or value 38 matches

ec2 X Clear filters

	Policy name	Type	Attached entities
<input type="checkbox"/>	AmazonEC2ContainerRegistryFullAccess	AWS managed	0
<input type="checkbox"/>	AmazonEC2ContainerRegistryPowerUser	AWS managed	0
<input type="checkbox"/>	AmazonEC2ContainerRegistryReadOnly	AWS managed	0
<input type="checkbox"/>	AmazonEC2ContainerServiceAutoscaleRole	AWS managed	0
<input type="checkbox"/>	AmazonEC2ContainerServiceEventsRole	AWS managed	0
<input type="checkbox"/>	AmazonEC2ContainerServiceforEC2Role	AWS managed	0
<input type="checkbox"/>	AmazonEC2ContainerServiceRole	AWS managed	0
<input checked="" type="checkbox"/>	AmazonEC2FullAccess	AWS managed	5
<input type="checkbox"/>	AmazonEC2ReadOnlyAccess	AWS managed	0
<input checked="" type="checkbox"/>	AmazonS3FullAccess	AWS managed	6

- In Permissions policies select **AmazonEC2FullAccess** and **Amazon S3FullAccess**

- Click on **Next**

Step 3 :- Review and create

Review and create

Review your choices. After you create the user, you can view and download the autogenerated password, if enabled.

User details

User name smit10	Console password type Custom password	Require password reset No
